

Technology at life service

AMAZONIC ONE ECO TECNOLOGIA S/A

From Brazil to the World, the biggest project of
protection of the largest tropical forest on the planet

THE AMAZON

AmazonicOne is a collective global organization protecting the world's largest rainforest where everyone can participate. Individuals, companies and organizations from all over the world can now contribute to the preservation of this ecosystem by sponsoring actions to protect the forest and indigenous culture.

Amazon Guardian

60% of Amazon is in Brazil. The importance of the Amazon forest is well known. Sadly, recent discoveries of its economic value have put in high-risk existence and overall value for life and the planet. Its unique and rich Biome pursues flora and fauna varieties that have not been yet explored. They are divided into four groups.

Amazon cares about the cities/farms/Indian communities and untouched forests.

It is well known that the oceans are responsible for the major production of oxygen. And Amazon with its vast green areas and privileged equatorial location filter the biggest part of it. What Amazonic One offers - Erase Carbon Footprints from our society. This business model makes anyone who wishes to participate in the program the Amazon guardian.

The Mechanism

Based on blockchain, we created a way for anyone on the planet to become a protector of the Amazon rainforest. Respecting Brazilian and international laws, AmazonicOne invests in the acquisition of land in the Amazon with the SOLE purpose of environmental and cultural protection. Our goal is to engage as many people as possible around the world interested in the real protection of the Amazon and its culture

Defi Tokens

But how to buy such large areas? To make this possible, Amazonic One became a limited company. In this way, we associate the company's capital with Defi tokens and we can determine that each token acquired represents one square meter of the land acquired by Amazonic One. We are putting tokens on the market privately to attract investors who want to make property protection possible. We do not sell land, we are not a real estate company, and what we are sharing is our social capital. You can also own a part of Amazonic One and participate in this fantastic project.

Vision

Share the responsibility of protecting the Amazon rainforest with global society through blockchain technology Defi.

Mission

Make sure that the world's forests are respected, using the potential to generate carbon credits for their sustainability and the technological tools to share this responsibility with modern society.

Values

The preservation of life on the planet we live on using technology as a mediator between humanity and the environment

PROTECTION

We protect our lands using the latest technological resources such as satellite monitoring, drones, vehicles as well as land teams on standby

1

Registration and legalization of AmazonicOne S/A and start of the DeFi Tokens offer

4

Token offering on the world market to protect square meter by square meter of the Amazon rainforest for ten years

2

Acquisition of land in the Amazon and incorporation into the capital of the company. Token creation

5

International fundraising for humanitarian projects integrating health and education for the population at risk in the Amazon

3

Hiring satellites, and ground crews for rapid response to environmental threats and implementation of monitoring.

6

Carbon credit management for the maintenance of all protection actions for Amazon.

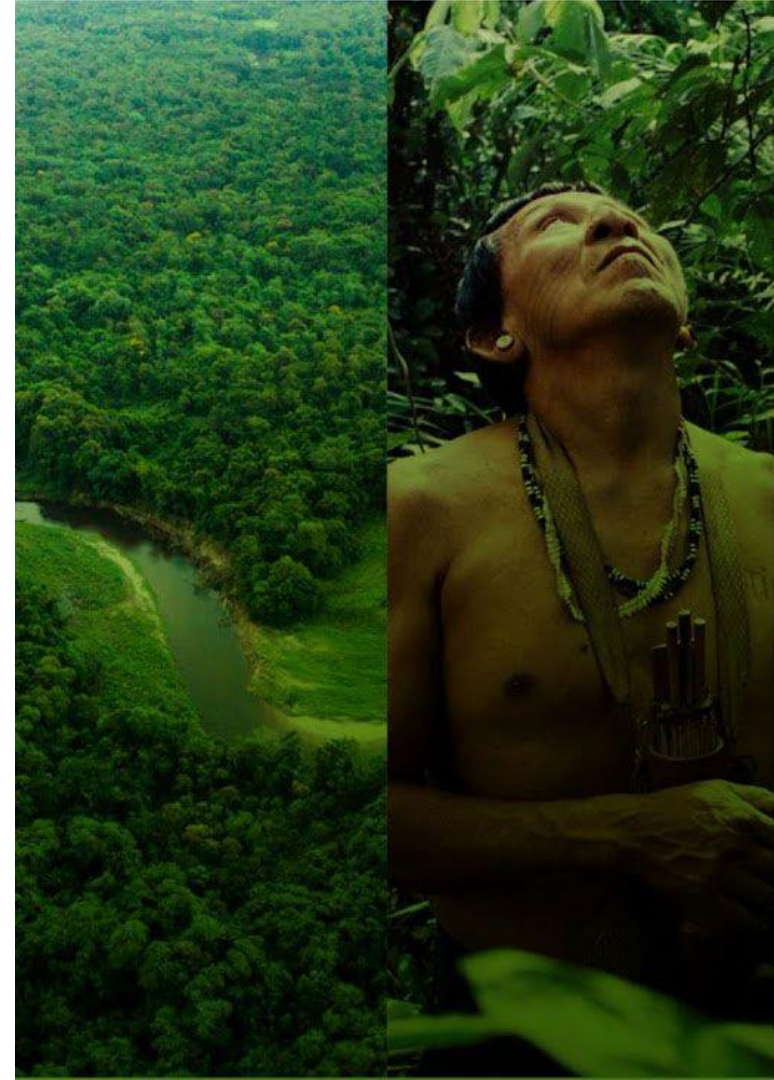

The Protection

Private contracts with local leaders and satellite and drone monitoring companies, in addition to a partnership with the Brazilian government's SIVAM system, are some actions to identify invaders and fires that will be promptly remedied by ground teams and aerial equipment.

The Lands

Amazonic One initiated the process of land acquisition in 2021.

Today we hold around 17.500 hectares of preservation and have contracts for more than 146.000 hectares. In total, there are more than 1.5 Million hectares already registered. With the help of people and companies around the world, we will be able to buy and rent lands to guarantee protection and recuperation of the most complex biome in the world.

Our goal is to reach 25 Million hectares in 10 years!

Approved and active registry in the
Brazilian government.

CÓDIGO E DESCRIÇÃO DA NATUREZA JURÍDICA 205-4 - Sociedade Anônima Fechada		

First Step :

We will offer pre-operational tokens for the protection of ten thousand hectares for ten years with a 50% discount on the value stipulated for the ITO. These investors, in addition to tokens referring to AmazonicOne shares, will receive the AmazonicOne Ambassadors and AmaxonicOne gold coin prize at the market launch event.

Second Step :

During our ITO (January/2023) we will offer tokens for the protection of an area of ten thousand hectares at the value of one dollar per square meter. This measurement of one square meter will be the minimum fraction to be acquired. The values obtained from the sale of the tokens will be used for the acquisition and protection of lands and local peoples. All tokens will be geo-referenced meter by meter with latitude and longitude.

Third step :

Humanitarian projects: Amazonic one listed 4 projects to protect the lives of the amazon population, essential to social equilibrium and maintenance of the Amazon region.

Boat Schools/Health. There will be twenty boats that will navigate the Amazon River and its tributaries, providing basic and professional education. The goal is to educate to preserve.

We will hire health professionals capable of performing emergency care, and carrying out tests and preventive procedures. All this is to improve the living conditions of the riverside populations.

Family Agriculture. Residents will be taught how to manage their small properties. We will create a market place so that they can offer their products to the world suited to their production and needs.

Rede do Bem – 20,000 computers with internet access will be distributed in health units, service centers, school boats, and hospital boats to improve communication and develop knowledge and integration of the population

Fourth Step :

In partnership with Remake Amazon, AmazonicOne will transform one hundred percent of its areas into carbon credit generators with UN monitoring and support.

100% of the values obtained will be invested in environmental and cultural preservation and the acquisition of more land.

In case of profit, they will be distributed as dividends to the token owners.
